

baby bath

The **Veitch Stainless Steel Baby Bath** is used in hospitals, recreation centers, caravan parks, shopping centers and other public facilities where parents' rooms may be required.

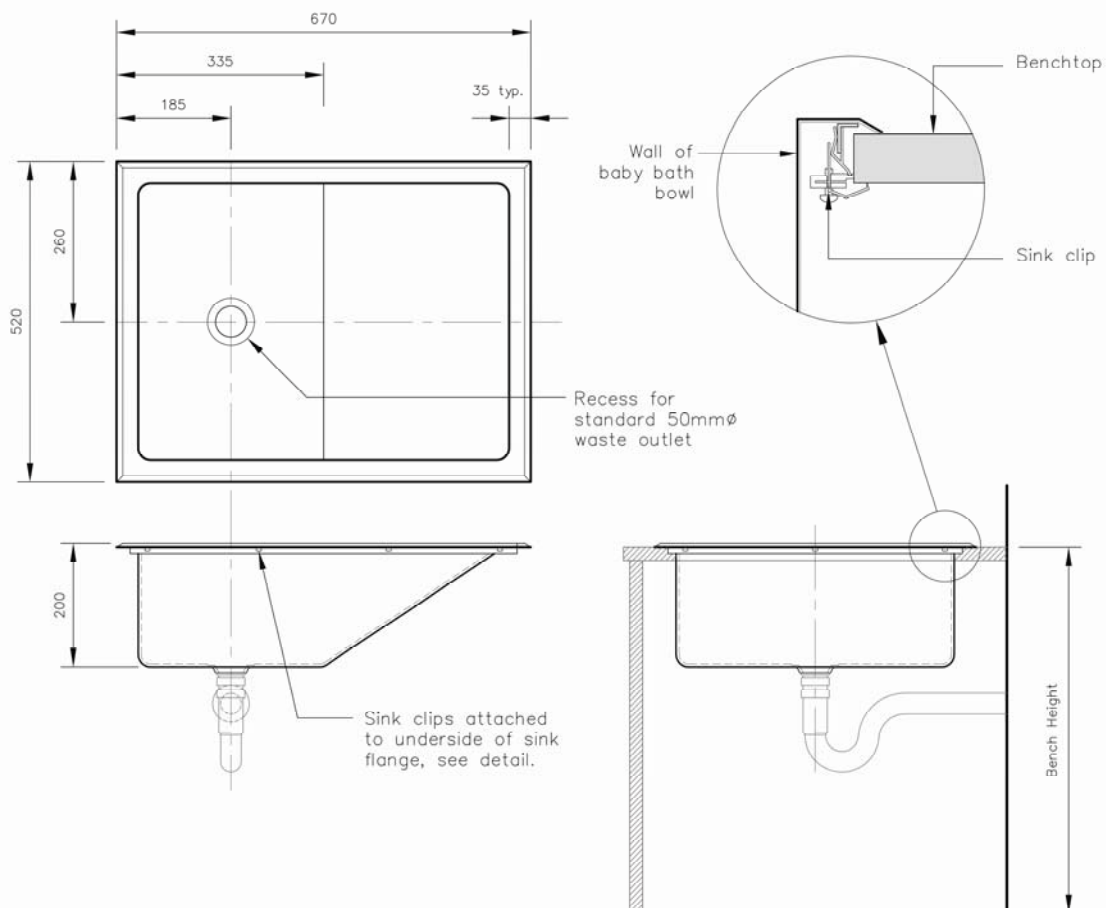

The bath is an insert model that is set into a bench, held down by sink clips to the underside of the bench top and has a waste recess to suit a standard 50mm dia. waste outlet (not supplied).

Upon request, the Baby Bath is also able to be custom integrated into a stainless steel fascia-style bench top with drainer. Please refer to Veitch Stainless Steel for more information.

The Veitch Baby Bath is manufactured entirely from 1.2mm Grade 304 stainless steel in a complete one-piece construction for cleanliness and minimal maintenance, is 100% Australian made and is fully recyclable.

The Veitch Baby Bath is an insert model that is set into a bench. It features one-piece construction for cleanliness and minimum maintenance.

Designed & manufactured in Australia.
