

insert café sinks

Veitch Stainless Steel Insert Café Sinks are particularly suited to the food and hospitality industries, and for commercial situations such as in factories, schools and restaurants. They are required to be set into the cut-out in a bench and are held down by sink clips to the underside of the bench top.

Four insert sink lengths are available in this range - two with single end bowls and two with double bowls.

Features include a 50mm dia. PVC waste outlet, tap hole as required, Veitch studded drainer board/s, Large 45 litre capacity sink bowls, and single-piece construction keeping maintenance to a minimum.

All Veitch Insert Café Sinks are manufactured entirely from 1.2mm Grade 304 stainless steel, are 100% Australian made and are fully recyclable.

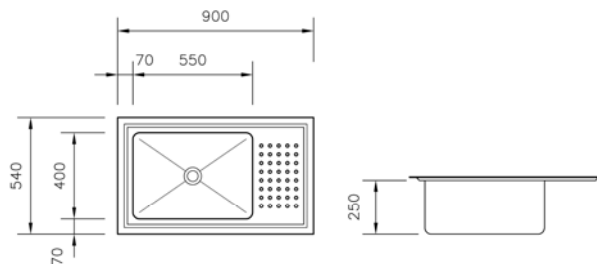

900mm single bowl

End bowl is reversible
