

standard urinal

The **Veitch Standard Urinal** is suited to situations where there is a high usage requirement, such as in hotels, office buildings, factories, sporting facilities and public toilets. It is particularly designed to reduce the effects of vandalism. It has a 170mm wide tray, requiring a tiled step be built in front of it, 275mm return wings at either end and a full-length weir sparge to the face.

The Veitch Standard Urinal features a 170mm wide tray, 275mm return wings, and a full length weir sparge flushing system to reduce stains and watermarks (top left & top right).

Operating features:

The Veitch Standard Urinal has a full length spurge one step flushing system which completely cleanses the urinal wall, return ends and tray area, thus reducing water marks and stains.

Key features:

Uniform weir spurge flushing system reduces stains and water marks.
Full seamless stainless steel construction keeping maintenance to a minimum.
Veitch stainless steel domed waste cover and flexibility of waste outlet positions.
Top or rear flush pipe entries.
Fully recyclable and 100% Australian made.

All Veitch urinals are supplied with a Veitch stainless steel domed waste cover (above).

Optional extras:

275mm wide free-standing ends; required where there is no wall or partition and where the end of the urinal is seen externally.
Joining strips for multiple installations.

Specifications:

Refer to page 3.1b for more information.

WELS approval rating:

All Veitch urinals are WELS approved. Refer to part B of this product data sheet for more information regarding specifications.

Designed & manufactured in Australia.
