w all mounted urinal

The Veitch Wall Mounted Urinal is a low cost solution for office buildings, factories, sporting facilities, and portable buildings that have a high usage requirement.

All Veitch urinals are WELS approved!

Operating features & Key features:

Refer to page 3.3a for more information.

Specifications:

Inlet: Top inlet for wall mounted cistern to suit with 40mm dia. tube (copper).
One inlet required for every 2.4 metre length.

Outlet: 50mm BSP outlet for connection to PVC trap.
Outlet position is 150mm from either end and 90mm from the rear wall.

Fixing: The urinal is designed with a 12mm tiling flange at rear, which must be vertical when installed. It is attached at the top by screwing through the tiling flange, and at the bottom by screwing through the stiffening bracket. Bring wall tiles down over the tiling flanges.
